

# XpertAgents for MS Copilot

[xpertrule.com](https://xpertrule.com)

## *Do you have 'trust issues' with your AI agent?*

With only 6% of companies fully trusting their AI agents<sup>1</sup> - where do you sit when it comes to the AI trust gap?

AI agents like MS Copilot are brilliant at generating content, answering questions, assisting knowledge workers and automating simple, low-risk tasks.

But they are **NOT** suitable for regulated decisions, mission-critical processes and high risk financial or legal scenarios.

*The top 4 reasons companies do not trust AI agents*

1

**Prone to hallucination**

2

**Non-deterministic**

3

**Not auditable or explainable**

4

**Regulators can not approve them**

# ***Introducing XpertAgents - auditable & deterministic AI agents for MS Copilot***

In just 4 simple steps, companies can now build AI agents they can trust. XpertAgent's encode your policies, regulations and human expertise into testable decision logic – with Copilot handling the natural interaction, each user is guaranteed an accurate, consistent, explainable and auditable outcome every single time.

*MS Copilot remains the familiar front-end with XpertAgents acting as the brain that does the decision making behind the scenes*

1

**Auto-generate Xpert Agent**

2

**Human validation & approval**

3

**Deploy to MS Copilot**

4

**Continuously adapt & improve**

# ***Who benefits from XpertAgents?***

With a massive 60% of AI failures being tied to a lack of auditability and poor governance<sup>2</sup> – XpertAgents excel in high risk or regulated industries, with cross-sector teams already realising huge benefits across:

- Compliance & Risk
- Legal & Regulatory
- Customer Support
- Operations
- IT & digital transformation
